JOHN PAUL II
MEDICAL RESEARCH INSTITUTE

About JP2MRI:

JP2MRI is a pro-life non-profit, founded in 2006. We specialize in using adult stem cells to find cures for incurable diseases such as cancer, Alzheimer's, Parkinson's, ALS, and more. We believe all research should uphold the dignity of all human life. You can learn more at jp2mri.org.

JOHN PAUL II
MEDICAL RESEARCH INSTITUTE

Make A Difference By Supporting Ethical Research

_____

GUIDING PRINCIPLE

"The service of humanity leads us to insist, in season and out of season, that those using the latest advances of science, especially in the field of biotechnology, must never disregard fundamental ethical requirements by invoking a questionable solidarity which eventually leads to discriminating between one life and another and ignoring the dignity which belongs to every human being."

~ Saint John Paul II

MISSION

The John Paul II Medical Research Institute (JP2MRI) is a non-profit organization which was established to create a faster and more streamlined process in conducting research that will find cures and therapies exclusively using a variety of human adult stem cells. The Institute also develops research tools to find new therapies using adult stem cells, while educating and increasing the number of current and future scientists and medical practitioners working with adult stem cells to uphold bioethics that is consistent with preserving the dignity of human life.

The John Paul II Medical Research Institute is a 501 (c)(3) tax-exempt public charity as defined by the Internal Revenue Service.

UNIQUE APPROACH

The John Paul II Medical Research Institute works to reduce the barriers between translating basic research into clinical research by coordinating research activities of the Institute with academia and industry partners. The Institute's goal is to help find treatment solutions for patients with disorders that could potentially benefit from adult stem cell therapies. The JP2MRI uses disease-specific adult stem cells to find possible treatments for cancer, ALS, Alzheimer's disease, Parkinson's, and rare diseases.

The Institute represents an opportunity for pro-life individuals to support ethically derived stem cell research consistent with pro-life values. JP2MRI **DOES NOT** conduct human embryonic stem cell research and does not perform therapeutic cloning or somatic cell nuclear transfer.

SUPPORTERS

The John Paul II Medical Research Institute has the support of Iowa and adjoining state Bishops. Additionally, the Institute has received endorsement and financial support from many Knights of Columbus conferences in Iowa, Illinois, and Wisconsin and donations from all 50 states and 37 countries. We need your continued support to help us grow and meet our goals.

TESTIMONIALS

"In view of the serious ethical dilemma that the embryonic stem cell research has provoked in the medical and health fields, I am very glad to hear of your courageous decision to promote a promising area of research which has not only demonstrated a more ethical approach but also a scientifically-proven superiority of results in the treatment of many diseases as compared with embryonic stem cell research approach."

~**Cardinal Alfonso Lopez Trujillo**, President of the Pontificium Consilium Pro Familia to John Paul II Medical Research Institute

"I commend your attempt to develop stem cell cures and therapies in an ethically appropriate way by engaging in adult stem cell research exclusively, and your commitment to a pro-life ethics…"

~**Former Archbishop Jerome Hanus**, Archdiocese of Dubuque, Iowa

"I look forward to following your work. Adult stem cell research is supported by the Church because of the great potential to find cures to end needless suffering with no ethical concerns…"

~**The Most Reverend Bishop Richard Pates**, Des Moines, Iowa Diocese

"I am pleased that your mission is to advance adult stem cell research that is consistent with the dignity of human life and that your plans include training the next generation of scientists in bioethics…"

~**Retired Reverend Bishop Martin Amos**, Davenport, Iowa Diocese

"It is a blessing for me to support the efforts of the John Paul II Stem Cell Research Institute and your work to find cures and therapies exclusively using adult stem cells with an emphasis on sound moral teaching…"

~**The Most Reverend Bishop Ralph Walker Nickless**, Sioux City, Iowa Diocese
