## Letter from the CEO and Request for Support

Dear Friend:

If you are reading this letter it means that you have been a generous donor to John Paul II Medical Research Institute (JP2MRI) and believe in our efforts not only to advocate against unethical and immoral medical research, but more importantly, to offer a solution. JP2MRI is the only organization proactively working to develop biotechnologies to replace embryonic stem cells and aborted fetal cells, discover ethical treatments and cures, and displace morally-illicit therapies produced from the pharmaceutical industry which generates over a 100 billion dollars annually. First, I would like to take this opportunity to offer my sincerest thanks for your support. One of JP2MRI's objectives is to help educate our supporters so that they can become better advocates and share their knowledge with others. I believe that whether you are a longtime supporter or a new supporter, it is likely that there are aspects about JP2MRI that you may be unaware of, or questions about our mission and research that you have always wanted to learn more about but which cannot easily be summarized in a one or two page newsletter. Some of the frequently asked questions we receive include: (1) What is the John Paul II Medical Research Institute?; (2) Why was JP2MRI formed and what is its mission?; (3) Does any other organization around the world conduct pro-life medical research like JP2MRI with an objective to eliminate embryonic stem cells and aborted fetal cells in the biopharmaceutical industry?; (4) Does the Institute receive financial support from the Catholic Church or other major Catholic organizations?; (5) What diseases does JP2MRI focus on treating?; (5) Is the Institute working on a COVID-19 vaccine and how does it differentiate from the current mRNA vaccines?; and (6) Is the U.S. government supporting JP2MRI's vaccine research?

As you can imagine, the above questions require us to provide sufficient background information and details to answer completely. JP2MRI has taken the time to answer these important questions not only to better educate you, but to also assist each of you to communicate these answers to others within your network if you are asked. Our discussion highlights the critical impact our research will have not only on individual patients seeking ethical treatment alternatives, but more importantly, on the entire Catholic healthcare system. Since these answers are fairly detailed, rather than send each of you a lengthy letter and use up precious funds which can be better applied to advance our research, I am providing you instead with a link where you can find answers to these questions. Regardless of how well you think you might know JP2MRI, I urge each of you to please take a few minutes to check out the provided link to better understand why your financial support is critical to the long-term survival of Catholics and Catholic healthcare and to learn how JP2MRI is making a meaningful difference in addressing a systemic problem that is impacting your health. Please use the following link:

<https://www.jp2mri.org/news> and read the story titled: *Frequently Asked Questions (FAQ) Letter from CEO About JP2MRI Mission, Catholic Church Support and COVID Vaccine Program - July 2022.*

JP2MRI's Founder, Alan Moy, MD, has also recently written an excellent and detailed editorial entitled "The Catholic Church Needs Reform and Independence from Secular Authorities on Matters of Public Health" which explores the Vatican's response to the coronavirus pandemic. In this editorial, Dr. Moy not only examines the scientific deficiencies with the mRNA vaccines that were promoted by the Catholic Church for the "good of humanity," but explains why the Catholic Church has continued to fail to receive proper scientific and medical guidance for several decades and has failed to uphold its own established Catholic tenets when it comes to accepting morally tainted medical procedures such as the Covid vaccine. I highly recommend that you read this article as it is not only explains the rationale that was used by the Vatican in determining how to proceed during the pandemic, but also identifies a much larger problem plaguing Catholic healthcare. The editorial can be accessed by the following link: <https://www.jp2mri.org/news>

Non-profit organizations such as JP2MRI have been significantly impacted in our fundraising efforts during the current economic downturn. The Institute's 2022 "Campaign for Cures" goal is to raise \$1 million to help advance ethical research in areas of large unmet medical needs. Unfortunately, as of September, 2022, the Institute has only raised \$195,000 towards our intended goal. While there are still three months left till the end of the year, time is running short and we could really use your support. Please know that every single dollar helps and will make it that much easier for us to reach our goal. Now more than ever, I encourage each of our donors to continue supporting our ethical research efforts by making a meaningful tax-deductible donation. JP2MRI competes for funding against secular medical research organizations that use embryonic stem cells and aborted fetal cells in their research. Unfortunately, many pro-life individuals are still unaware that they are financially supporting a culture of death by financing these larger secular research organizations with bigger marketing budgets. Please help educate others within your network about this issue and encourage them to learn about JP2MRI and our mission to end this practice. To learn more and follow our progress, please visit our website ([jp2mri.org](http://jp2mri.org)) and follow us on Facebook, Rumble.com and Gab.com. Thank you very much for your support.

Kind regards and God Bless,

Jay M. Kamath, J.D. / CEO
